

Electronic Door Lock

ID LOCK 5000

Applications

- Locker
- Cupboards
- Fitness Centres
- Indoor swimming pools

Features

- No transponder necessary
- Access via number code
- Robust stainless steel keys
- Different possible programs

Description

The electronic door lock ID LOCK 5000 offers a high quality and safe solution if no transponder (e.g. member card) is available. Access to any locker is given via a number code. For added security, after three failed attempts at entering the code, the door will enter "lockdown" mode for one minute. It is possible to cancel this lockdown with the master code. The door lock opens with a mighty spring. The lock closes automatically by a servo motor.

The electronic door lock ID LOCK 5000 is a robust and a high-quality lock, perfectly usable for cupboards and lockers. The ID LOCK 5000 is characterized by an elegant touch screen and - thanks to the shortened cables from iDTRONIC - assembly-friendly construction.

Equipped with 4, with torx screws secured, AAA batteries, the ID LOCK 5000 has a remarkable lifetime of around 1 year.

Programming options are public, limited public and private mode. The fastening frames as well as the screws are included in scope of delivery.

Technical Data

Specifications	
Dimensions	Panel: 65 × 65 × 13.6 mm Lock: 80 × 80 × 27 mm Hook: 75 × 27 × 21.5 mm
Weight	200 g (with lock hook)
Battery type	DC 6 V (4 × 1.5 V AAA)
Power consumption	Static: 70 µA Dynamic: 200 mA
Working life (battery)	Standby mode: 1 year
Working life (mechanic)	500,000 uses
Operating temperature	-15 °C ~ 55 °C
Humidity	5 % to 95 % (not condensing)
Material	Lock: ABS & stainless steel Panel: ABS, zinc alloy & acrylic
Quantity of possible codes	100,000,000
Code length	4 - 8 digits
Response Time	Less than 500 ms
Salt spray testing	72 hours
Certificates	CE, ISO9001, RoHS, IAF, FCC
Scope of supply	ID Lock 5000 (Panel, lock & hook) Linkcable User manual Cover (Battery & hook) Screws
