- Integrated LED Display
- Remote Panel
- Mechanical Release Key
- Optional:
 - mech. anti-panic folding arms
 - 2 RFID HF Reader (MIFARE®)

RFID Options

- HF (ISO14443A)

Description

The three-armed turnstile ID GATE 6500 from iDTRONIC is the basis type of iDTRONIC's turnstiles which was designed for indoor application.

The housing of the ID GATE 6500 is made of powder-coated steel in dark grey. The barrier arms consist of glossy stainless steel.

The RFID reader, which will be needed for the access control, can be purchased by request. Therefore you save the cost of a separate purchase and the effort to install the reader.

The LED illumination of the turnstile shows clearly if the person is authorized or not. Green light stands for an authorized person while the red stop signal indicates that the turnstile is closed and going through the control stays refused.

Thanks to the standard scope of delivery provided remote control the ID GATE 6500 can easily be unlocked from the reception.

The turnstile ID GATE 6500 will be equipped with an emergency key. Optional the ID GATE 6500 can be equipped with mechanical anti-panic folding arms. Therefore the arms can only be folded down manually.

Technical Data

Specifications	
Overall dimensions with barrier arms	1040 × 640 × 683 mm
Packaging and Weight	1140 × 753 × 355 mm (55,9 kg)
Operating Voltage	12 ± 1.2 VDC
